

## CMS Distribution gets a prime solution for Amazon process compliance

**CMS Distribution is Europe's leading specialist distributor, supplying business and consumer technologies in the UK, Ireland, France, the Netherlands, Spain and Sweden.**

**CMS work with over 60 suppliers worldwide and over 3000 resellers, including Amazon.**

### The Challenge

CMS required a solution that allows them to comply with the Amazon "License Plate Receipt" process. They needed a system that supported GS1 standard SSCC (Serial Shipping Container Code) compliant Amazon Certified labels, and EDI (Electronic Data Exchange) advanced shipping notifications.

### The Solution

**We developed a Packing App on the Honeywell Movilizer platform that:**

- captures the required SSCC details in real-time
- prints labels to Amazon's specifications out of SAP
- triggers the EDI messaging of packed deliveries/parcels direct to Amazon

## The Result

The whole process took just six weeks from app realisation to design and implementation.

**CMS now have a fully certified Amazon solution** that gives accurate advanced notice of deliveries via ASNs (Advanced Shipping Notifications).

CMS can **trace everything that's in each individual box**, even if there are several boxes on an order. Customers know exactly what they are going to receive in advance which means they **no longer have to re-label the stock** when it arrives.

The increased data accuracy and traceability dramatically reduces query resolution saving time for CMS and improving their customer reputation.

### The Packing App:

Easy to use, keeping operator training needs to a minimum

Accurate, updating SAP in real-time

Able to print labels straight from your mobile device

Able to improve customer satisfaction by ensuring there are no incomplete customer deliveries
